***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4 and 9-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Furst et al (US 2004/0162517)

Furst teaches a disposable injector comprising a body (20) with an initiation device (49), a charge in a removable cartridge (7) disposed in a housing (21), and a reservoir (12).

Regarding claims 2-4,10-12, Fig 13; claim 9, Fig 51.

***Claim Objections***

3. Claim 9 is objected to because of the following informalities: the primer lacks antecedent basis. Appropriate correction is required.

***Allowable Subject Matter***

4. Claims 5-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3767

5. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or suggest a circuit which follows the shape of an inverted U, in combination with the other limitations of the claims.
